

# Bria Setup for Android

1. Download paid version of Bria from Play Store.
2. The account you want to add is SIP. Go to Settings, then click on add Accounts or the + Sign

3. Once on the Account section you will see the screen below. Please note that these provisioning details can be found on your admin portal ([cp.activepbx.com](http://cp.activepbx.com)) or by calling our support team at 786-718-1820. The device needs to be created on your user (phone tab section) on the portal in order to link it to the extension you want to use this application for. Once the user is created then you will have the provisioning details. See the second image below for an example.

- Once you have gathered the provisioning details go back to the cellphone application and enter the following:

**Account Name:** Enter the company's Domain/Proxy as it appears on cp.activepbx.com

**Display as:** Type in your name. This is the caller ID name that will appear when making internal calls.

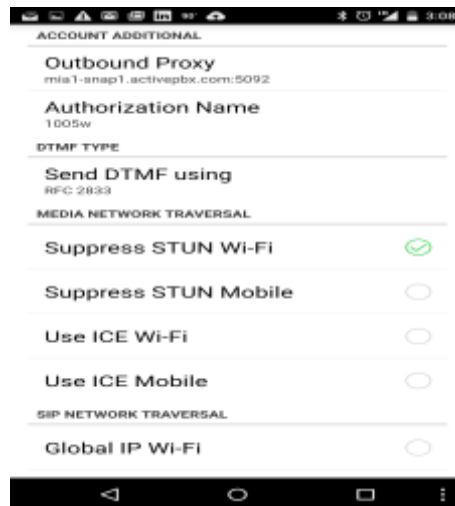

**Username:** Enter your username as it appears on cp.activepbx.com. Example: **1010d**

**Password:** Enter the password as it appears on cp.activepbx.com. Example: **ZNxjSTVB**

**Domain:** Enter the same as "Account Name"

**VM Number:** Enter **5001**

- Scroll to the bottom of the screen. Click on Account Advanced

Enter the following:

- **Outbound Proxy:** *This should be found on the provisioning details as well. Example: mia1-snap1.activepbx.com:5092*
- **Authorization Name:** *This should be found on the provisioning details as well. Example 1010d*

6. Click back until you reach the Accounts screen

7. Click on the circle that has a check mark to **ENABLE & DISABLE**
8. Once Enabled your Bria Softphone should be registered
