

Starting ActiveDial First-time Startup:

1. If ActiveDial is not already running, start it as you would any other program: Use the Windows Start menu or double-click the desktop icon.
2. Login with the credentials supplied by ActivePBX
3. You can now make calls with the application, many of the functions your desk phone can do can also be accomplished in the ActiveDial application as well.

Add contacts under the Contacts Tab, alternatively, select the head and shoulders icon between the grid of squares and star on the bottom of the application.

To see call history, select the clock on the bottom of the application.

ActiveDial

More Options:

The screenshot shows the ActiveDial softphone interface for user David Odio. The interface includes a menu bar with 'Softphone', 'View', 'Contacts', and 'Help'. Below the menu, there are status indicators for 'Presence Status' (Available) and 'Outgoing Account' (ActivePBX). A volume control slider is visible. A search bar with the placeholder 'Enter name or number' and a call button is present. A numeric keypad is displayed below the search bar. A settings menu is open, listing the following options:

- Auto Answer
- Hide my Number
- Turn Letters To Numbers
- Disable Call Waiting

The bottom of the interface features a navigation bar with icons for a grid, a person, a star, and a clock, along with the ActiveDial logo.
